### DETAILED ACTION

1. Claim 16-17, 21-23 are allowable. Claims 18-19, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between invention species, as set forth in the Office action mailed on 1/25/2005, is hereby withdrawn** and claims 18-19 hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The prior art of record does not suggest or render obvious the combination as claimed specifically including a catheter having a lap joint between a metallic tubular member and a polymeric tubular member having an improvement being a functionalized titanate coupling agent disposed between the metallic tubular member and the polymeric tubular member in the lap joint and the functionalized titanate having a first functional group bonding adhesively to the metallic tubular member and the functionalized titanate having a second functional group bonding adhesively to the polymeric tubular member.
